

CONSTRUCTION MANAGER

About Us

We are a full service engineering, procurement and construction management company, with a lean, scalable project delivery approach and an “Engineering to Construct Mindset”. We provide the full spectrum of services across the entire lifecycle of a project, from planning and development to conceptual design, feasibility studies, detailed engineering, EPC-EPCM, commissioning and brownfields. We’re a Canadian company with over 10 years’ experience in Conventional and Heavy Oil, Natural Gas, Pipelines, Gathering Systems and Flowlines, Waste Treatment, Recovery and Disposal and LNG. Backed by a 100 year history in engineering, procurement, and construction, we provide project delivery solutions for some of the most challenging projects around the globe.

About our Culture

Our DNA defines who we are as a company and what makes us stand out. We live and breathe our values and beliefs – they are the cornerstone of how we work together.

We value:

Integrity ♦ Respect ♦ Trust ♦ Quality ♦ Teamwork ♦ Commitment ♦ Results

We believe:

- ...that nothing is more important than the safety of people, protection of the environment and compliance with regulations
- ...that our people are our most valuable asset
- ...that success comes when we are production-driven and aligned to our client’s business goals
- ...that quality and excellence in everything we do is both a requirement and a commitment
- ...that over-promising never leads to exceptional results
- ...that continuous improvement is vital in an agile world
- ...that standing behind our word means something
- ...that being trustworthy is crucial at work and in life
- ...that – without exception – facilities must be designed to be safe, operable and maintainable

About the Opportunity

With offices in Calgary and Vancouver, we are growing our team of talented professionals who have a passion for safety, quality and exceptional project delivery. This is an exciting

opportunity to leverage your experience into the growing LNG and petrochemical sectors. You'll be a key member of our team and have a big impact on our pursuit of excellence.

As a Construction Manager with Clough Enercore, you'll lead the implementation of a construction strategy and plan and manage construction execution. You will oversee project construction progress and the critical paths to ensure the schedule is on track. You will manage construction resources and ensure that all contracts and permits are in place and adhered to. You will provide valuable input into the management of the execution schedule, costing and scopes of work. You will drive best value decision making to ensure the project moves forward on site, minimizing delays and instilling a production-driven mindset. You will identify and manage construction risks and ensure material risk management critical controls are implemented and effective. You'll ensure construction is safe, high quality and to the client's satisfaction.

About You

You are an experienced Construction Manager, with a solid background in EPC/EPCM projects. You've worked on projects in conventional oil & gas, petrochemicals, natural gas processing and/or LNG. You have a track record of successful construction planning, execution and completion and have a "safety first" mindset. You have the commercial acumen to manage contract and supply agreements. You have excellent communication and collaboration skills and the ability to inspire others to follow your lead.

If this sounds like you and you're looking for an opportunity to make a big impact, submit your resume!
