

## PROJECT MANAGER

### About Us

We are a full service engineering, procurement and construction management company, with a lean, scalable project delivery approach and an “Engineering to Construct Mindset”. We provide the full spectrum of services across the entire lifecycle of a project, from planning and development to conceptual design, feasibility studies, detailed engineering, EPC-EPCM, commissioning and brownfields. We’re a Canadian company with over 10 years’ experience in Conventional and Heavy Oil, Natural Gas, Pipelines, Gathering Systems and Flowlines, Waste Treatment, Recovery and Disposal and LNG. Backed by a 100 year history in engineering, procurement, and construction, we provide project delivery solutions for some of the most challenging projects around the globe.

### About our Culture

Our DNA defines who we are as a company and what makes us stand out. We live and breathe our values and beliefs – they are the cornerstone of how we work together.

We value:

*Integrity ♦ Respect ♦ Trust ♦ Quality ♦ Teamwork ♦ Commitment ♦ Results*

We believe:

- ...that nothing is more important than the safety of people, protection of the environment and compliance with regulations
- ...that our people are our most valuable asset
- ...that success comes when we are production-driven and aligned to our client’s business goals
- ...that quality and excellence in everything we do is both a requirement and a commitment
- ...that over-promising never leads to exceptional results
- ...that continuous improvement is vital in an agile world
- ...that standing behind our word means something
- ...that being trustworthy is crucial at work and in life
- ...that – without exception – facilities must be designed to be safe, operable and maintainable

### About the Opportunity

With offices in Calgary and Vancouver, we are growing our team of talented professionals who have a passion for safety, quality and exceptional project delivery. This is an exciting

opportunity to leverage your experience into the growing LNG and petrochemical sectors. You'll be a key member of our team and have a big impact on our pursuit of excellence.

As a Project Manager with Clough Enercore, you'll provide leadership to every phase of a project. You will be accountable for the successful delivery of all aspects of a project, including safety, quality, engineering & design, supply chain management, and construction. You'll lead client interactions and interfaces, develop cost estimates and schedules, control project reporting and change management, and employ effective risk management strategies. You'll ensure each project is delivered on time, on budget, and to the client's satisfaction.

## **About You**

You are an experienced Project Manager, with a solid background in EPC/EPCM, from feasibility to construction. You've worked on projects in conventional oil & gas, petrochemicals, natural gas processing and/or LNG. You have a track record of successful project delivery and have built teams that deliver on their promises. You have experience in all phases of a project, from the boardroom to the field. You have excellent communication skills and the ability to inspire others to follow your lead.

If this sounds like you and you're looking for an opportunity to make a big impact, submit your resume!
